

Vitamin D3 5000 IU

A dietary supplement to promote the body's absorption of calcium and phosphorous, which are essential for the development and maintenance of healthy teeth and bones.*

New research suggests that it may support immune system function by supporting healthy cell growth.*

Supports:

- Bone health*
- Calcium balance*
- Cardiovascular function*
- Healthy cell growth*
- Immune system modulation*

About Vitamin D:

- Vitamin D is a fat-soluble vitamin that is essential for maintaining normal calcium metabolism. Vitamin D3 (cholecalciferol) can be synthesized by humans in the skin upon exposure to ultraviolet-B (UVB) radiation from sunlight, or it can be obtained from the diet.

Calcium Balance:

- Maintenance of serum calcium levels within a normal range is vital for normal functioning of the nervous system, as well as for bone growth, and maintenance of bone density. Vitamin D is essential for the efficient utilization of calcium by the body.

Cardiovascular Support:

- Adequate vitamin D levels may be important for maintaining blood pressure within normal ranges.* Vitamin D also impacts heart health by supporting the body's natural cytokine production and vascular function*

Cell Differentiation:

- Cellular proliferation is essential for growth and wound healing. Uncontrolled proliferation of damaged cells is unhealthy. Vitamin D inhibits uncontrolled proliferation and stimulates differentiation, which is the process of specializing cells for specific healthy functions.*

Immunity:

- Vitamin D is an immune system modulator to support healthy T Cell and macrophage responses.*

Supplement Facts

Serving Size 1 Capsule

Amount Per Serving

Vitamin D3 (as cholecalciferol) 5,000 IU

Other ingredients: vegetable cellulose, microcrystalline cellulose, vegetarian leucine.

Warning: Individuals taking more than 2,000 IU per day should have their vitamin D levels monitored. If pregnant or nursing, consult your healthcare practitioner before taking this product.
